

PTFE BRAID PACKING - TYPE PF155

Product's category

Braid packing made of pure expanded PTFE

Characteristics

Composed of an expanded PTFE yarn that combines a thermal conductivity 3 times higher than that of the normal PTFE braid with excellent lubrication.

Thanks to the low friction coefficient, risks of shaft wear are avoided, losses are significantly reduced and the braid has a considerably longer service life. Contains silicone oil.

Applications

Centrifugal pumps, agitators, mixers.
